

TECHNOLOGY ADOPTION STAKEHOLDER INTERVIEW GUIDE

Based on Module 1: Emerging Technologies

Prepared for:

Manila Manufacturing Corporation (MMC)

Prepared by:

Dela Peña, Ma. Carmela L.
TechVision Consulting Inc.

Course:

BSCS-3B

Instructor:

JohnEros Puyo

Date:

September 12, 2026

1.0 INTERVIEWER INSTRUCTIONS

This interview will help us understand MMC's current situation and what technology you already use, what you know about new technologies, and how ready you are to adopt them. Please explain things simply and honestly. Write down every answer clearly. We will use this information to give you useful, realistic suggestions at the end. Everything you share stays private.

2.0 INTERVIEWEE INFORMATION

3.0 Interview Questions

The questions below are grouped by topic.

A. Understanding of Emerging Technology

1. What technologies does MMC use right now (computers, machines, software)?
2. Have you heard of the term "emerging technology" before? What do you think it means?
3. Which new technologies have you heard about lately, even outside of work?
4. How familiar are you with AI, IoT, or Cloud Computing?

B. Artificial Intelligence (AI) and Machine Learning

1. Does MMC use any AI or Machine Learning tools today?
2. Where in MMC's work do you think AI could help (example: checking product quality, predicting sales)?

3. What worries do you have, if any, about using AI at work?

C. Augmented Reality (AR)

1. Have you heard of Augmented Reality or AR (like in the game Pokémon GO)?
2. Do you think AR could help MMC, like guiding workers during repairs or training?

D. Internet of Things (IoT)

1. Are MMC's machines connected to the internet or to sensors?
2. Would it help your department if machines could send data automatically?

E. Cloud Computing

1. Does MMC save its files and data using cloud storage (like Google Drive) or only on local computers?
2. Do you have any worries about using cloud storage for company data?

F. Big Data Analytics

1. What kind of data does MMC collect (example: sales, feedback, production numbers)?
2. Do you think MMC is using this data well to help make decisions?

G. Quantum Computing

1. Have you heard of Quantum Computing before?
2. Do you think MMC needs this kind of technology now, or only far in the future?

H. Readiness, Skills, and Budget

1. Does your team already have the skills to use new technology? If not, what training do you need?
2. Is there a budget set aside for new technology projects?
3. What problems might slow down MMC from adopting new technology?
4. From 1 to 5, how ready is MMC to adopt new technology? Why?

4.0 Closing Remarks

Thank you so much for your time and for sharing your honest thoughts. All the answers you gave us are very useful. They will help us make a simple and practical plan for MMC. We do not want to push you to buy expensive tools. We just want to find the right technology that fits your needs, your budget, and your team's skills. We want technology to help you work easier and better.

4.1 Next Steps

- We will study all your answers and write a full report.
- The report will have a simple plan — which technology to try first, how to start step by step, and how to train your team.
- We will send you the report as soon as it is done. You can ask questions or suggest changes after you read it.
- If you have more ideas or questions, you can contact us anytime.
